

Residential Energy Efficiency Program Ductless Heating and Cooling

Offer valid through September 30, 2011 or until funding expires

If you're tired of unattractive, noisy AC window units and want to save energy and money on your utility bill year around, we want to help you pay for an upgrade!

We're helping Benton PUD customers upgrade to a Ductless Heating and Cooling System that uses a fraction of the electricity and provides more comfort than outdated systems. If you currently have outdated baseboard, wall heaters or an electric forced air furnace, you are likely using more energy than needed to heat your home. For a limited time, homeowners can receive a \$1,000 or \$1,500 rebate for the installation of a qualified ductless heating and cooling system and may be eligible for a federal tax credit.

Why upgrade to a Ductless Heating and Cooling System?

- Systems come standard with air conditioning - no more window units!
- Save energy and money every month on your utility bill
- Experience a more comfortable home
- Low-cost and easy installation
- Up to \$1,500 utility rebate for qualified installations
- Up to \$1,500 federal tax credit available for some systems

Up to \$1,500 rebate available!

Benton PUD is offering \$1,000 and \$1,500 rebates to customers with qualified installations. Many Ductless Systems qualify for additional federal tax credits (30% of the total cost, up to \$1,500). Learn more at www.goingductless.com.

Save 25% to 50% per year on your heating bill... while living in a more comfortable home. At this rate, this system could pay for itself in just a few years!
